PROJECT EXPERIENCE

IT Support Management System | 2026

Developed a web-based IT support management system for handling support tickets, asset management, user management, and service requests. Implemented role-based access control, dashboards, reporting features, and workflow automation.

Job Vacancy and Recruitment System | 2026

Built a full-stack job portal platform that enables employers to post vacancies and manage applications while allowing job seekers to search, apply, and track their applications efficiently.

Visit Ethiopia Mobile Application | 2024 – 2025

Developed a mobile application promoting Ethiopian tourism and cultural heritage, featuring destination browsing, booking services, social interaction features, and offline data caching.

Feedback and Corruption Suggestion System | 2024

Developed a secure platform for the Ethiopian Ministry of Innovation and Technology to collect and manage public feedback and corruption reports, featuring OTP-based account recovery, role-based access control, and analytics dashboards.
